Summary

Expert in responsive design and modern front-end technologies such as React with integration of scalable back-end technology such as Django in your service. Also, expertise in REST API for CRUD operations.

Skills

React • Django • PostgreSQL • SQL • HTML/CSS • JavaScript • Python • Tailwind CSS

Work Experience

Full Stack Web Developer

Self Employed • Self-employed

Remote

- Created easy-to-use APIs for third-party integrations, enhancing the functionality of existing applications without compromising on performance or security.
- Applied responsive design principles to ensure consistent display and functionality across a wide range of devices, including mobile phones, tablets, and desktop computers.
- Ensured data security by implementing robust authentication and authorization mechanisms on both client-side and server-side applications
